

## Pony Tales of Nancy Atkinson's 1967 Convertible Mustang

**1967 Mustang, 289, 2-barrel carburetor, power steering, frost turquoise**

I got into Mustangs through my twin sons and their friends. They introduced me to Mustangs Northwest, and I was hooked. The people in the club were super helpful and friendly and fun to cruise with. My first Mustang is a red coupe but after having that one for a few years, I yearned for a convertible. A Mustangs Northwest member introduced me to this one and I was immediately in love. It had been garaged for a long time. The seats were being used for storage and the engine needed a very, very thorough cleaning and revitalization. The paint was the original paint but with some dings and flaws. As you can see the engine is much cleaner and she was painted last fall. In 2018, five club members caravanned to Edmonton, Alberta, Canada and she drove like a charm. This Labor Day we will be caravanning to Boise, Idaho for the International Mustang Meet.
